

INDUSTRIAL CLEANER *Solutions*

- Cleans and degreases motors under electrical current
- Leaves no residue to attract dirt and no need to rinse cleaned equipment
- Non-flammable, non-conductive

CARE FOR WORK ENVIRONMENTS®

EEC is a powerful solvent formulation that attacks grease and dirt on contact. EEC is designed to easily blast greasy soil from energized electrical equipment flushing hard to reach spaces for efficient, thorough cleaning.

EEC is nonflammable and has no flash point. EEC has a high dielectric strength of 29,000 volts allowing effective degreasing and cleaning without concern about shorting out equipment or shock hazards.

EEC leaves no residue to attract dirt and there is no need to rinse cleaned equipment.

APPLICATIONS

- Landscaping equipment motors
- Ceiling Fan Motors
- Generators
- Electrical Switches
- Electrical Connectors
- Timers
- Relays
- Thermostats
- Power Tools

DIRECTIONS FOR USE:

Spray EEC aerosol directly on surface or motor to be cleaned. Use the extension tube for pinpoint accuracy. Spray liberally on surface until dirt and grease is removed or the fluid run-off is clear. Whenever possible, put a drip pan or towel under parts to catch run-off for proper disposal. Start spraying at top of item aiming spray downwards to increase spray penetration. EEC can be used on operating electrical motors.

EEC is not recommended for use on Styrene, Polystyrene, ABS, and acrylic or polycarbonate plastics. EEC is not for use on computer equipment. For best results spray can should be at room temperature (about 72°F / 22°C).

Note: For energized equipment use only. Not to be used for motorized vehicle maintenance or their parts due to California VOC restrictions.

Please review label and SDS for all product directions, precautions and first aid information.

TECHNICAL DATA:

APPEARANCE: clear aerosol spray

ODOR: solvent

FLAME EXTENSION: No flame extension. Non-flammable aerosol.

DIELECTRIC STRENGTH: 29,000 volts
