

FOOD PREPARATION *Solutions*

TWISTER™ FOAMING ACID CLEANER

- High-foaming cleaner
- Concentrated acid cleaner effective against mineral deposits and beer stones
- NSF and CFIA registered for brewery and food processing uses
- Stainless steel brightener

CARE FOR WORK ENVIRONMENTS®

TWISTER™

FOAMING ACID CLEANER

SPECIALLY FORMULATED

Twister is a concentrated, self-foaming acid cleaner designed to remove hard water and protein scales from brewery equipment as well as food and beverage processing equipment.

Twister's self-foaming formula produces high, stable foam that eliminates the need for additional foam "boosters". High, stable foam clings to vertical surfaces increasing chemical contact time and reducing labor. Twister can be applied through air, or water-powered, foaming equipment.

SAFE AND EFFECTIVE

Twister's fast-acting formula effectively removes beer stone, protein and hard water scale from brewery equipment. Effectively brightens stainless steel surfaces.

Twister effectively removes protein and hard water scale from a variety of food processing facilities including:

- Bakeries
- Breweries
- Bottling Plants
- Beverage processing plants
- Canneries
- Dairies
- Fruit and vegetable processing plants
- Institutional kitchens
- Meat and poultry processing plants
- Restaurants
- Seafood processing plants

DIRECTIONS FOR USE:

Standard Dilution Rates:

- Light-duty cleaning – 2 oz. per 1 gallon of water (1:64)
- Medium-duty cleaning – 4 oz. per 1 gallon of water (1:32)
- Heavy-duty cleaning – 6 oz. per 1 gallon of water (1:21)

For removal of mineral and protein scale from equipment:

Dilute 2 – 4 oz. per gallon potable water. For best results, apply to surface as foam through air or water foam generation equipment. Let stand for 5 – 10 minutes, scrub if needed, and rinse thoroughly with potable water. Do not allow foam to dry on surface; rewet if necessary.

To brighten stainless steel: Dilute Twister with 2 – 8 oz. per gallon of potable water. For best results, apply as foam through foam generation equipment, air or water. Allow to remain, scrubbing intermittently, until desired degree of brightness is obtained. Rinse thoroughly with potable water.

NOTE: DO NOT use acid products, such as Twister, on chrome, brass or other polished metal surfaces as irreversible damage may occur. If contact should occur, flush immediately with water. Do not mix with any other chemicals.

TECHNICAL INFORMATION

APPEARANCE: clear, light amber liquid

ODOR: mild acid

pH (concentrate): 4.0

SOLUBILITY IN WATER: complete

VOC CONTENT: 0%

DENSITY (LBS/GAL): 9.9
