

INDUSTRIAL CLEANER *Solutions*

- Concentrated, water-based cleaning solution formulated for use with State AquaBrute Aqueous Parts Washer
- Easily cuts through built up grease, carbon deposits and dirt
- Non-corrosive, non-acid and non-flammable formula meets VOC restrictions

CARE FOR WORK ENVIRONMENTS®

State AquaBrute Aqueous Parts Washer Fluid is a concentrated, water-based cleaning solution formulated for best use in State AquaBrute Aqueous Parts Washer. State AquaBrute Aqueous Parts Washer Fluid was formulated to easily cut through built up grease, carbon deposits and dirt while eliminating the flammability and toxicity of common solvent-based parts washer fluids used in the industry today. It is nonflammable and low odor. Under normal conditions of use, this product does not exhibit characteristics requiring disposal as a hazardous waste under RCRA guidelines. State AquaBrute Aqueous Parts Washer Fluid complies with existing VOC regulations.

DIRECTIONS

State AquaBrute Aqueous Parts Washer Fluid is designed to be diluted 1:4 with water (25%). For best results use in a heated parts washer with temperature above 95°F. Use brush to remove heavy grease and dirt. Cleaning solution replacement is determined by operating conditions and soil loading. For best results test the cleaning solution weekly. If the cleaning solution pH drops below pH 7.0 or the fluid is cloudy replace the cleaning solution and refill with fresh cleaning solution. As a general rule cleaning solution should be replaced every 60 days as a minimum. It is not recommended to top off or add additional product to the existing dirty cleaning solution.

Dispose of cleaning solution in accordance with local regulations.

TECHNICAL DATA:

APPEARANCE: clear colorless liquid

ODOR: mild

DENSITY: 8.4 lb/ gal

TYPICAL pH (CONCENTRATE): 8.5-9.5
