

# FLOOR CARE *Solutions*

## STATE<sup>®</sup> **EXCELLENCE** WOOD FLOOR SEALER

- Unique water-based polymer designed for maximum durability in high-traffic areas
- Provides complete coating to bare wood and can be applied on top of existing finishes
- Reduces overall application time as compared to traditional oil-modified, urethane finishes

CARE FOR WORK ENVIRONMENTS<sup>®</sup>

# STATE<sup>®</sup> EXCELLENCE WOOD FLOOR SEALER

## STATE-OF-THE-ART

State Excellence uses a special water-based acrylic silicone hybrid polymer, which is the latest polymer technology designed for heavily used gymnasiums and racquet ball courts. It maintains its durability and superior shine while remaining VOC-compliant.

## EASY TO MAINTAIN

State Excellence can be used to provide a complete coating to bare wood, and can also be applied on a wide variety of wood floor sealers. Simply prepare the floor as recommended and apply for a great, fresh appearance. A quick scrub and recoat can be done in a day, preventing the costly downtime that occurs when completely stripping and applying an oil-modified, urethane wood finish.

## DIRECTIONS FOR USE

1. Thoroughly sweep or dust mop the floor and remove gum or other debris.
2. Dry abrade the floor with 100 grit screen and a 175 rpm swing machine.
3. Tack the floor with water and clean towels to remove all residue.
4. Apply with a lightweight T-Bar or lambs wool applicator.
5. Apply 3 - 5 coats of finish until the desired appearance is achieved. Allow 2 - 4 hours in-between coats.
6. Allow floor to cure 24 - 48 hours before opening to moderate traffic.
7. Allow a minimum of 72 hours before opening to regular traffic.

## TECHNICAL DATA

**APPEARANCE:** milky emulsion

**ODOR:** mild

**pH:** 7.5-8.5

**FLASHPOINT:** none at 200°F

**STABILITY:** two years

**SOLIDS CONTENT:** 25 - 30%

**SLIP RESISTANCE:** minimum 0.5 as tested by ASTM D-2047

**REMOVAL:** use State's Thick Strip
