

GROUNDS CARE *Solutions*

FORMULA 400-X **PARCH**®

CONCENTRATED, NON-SELECTIVE WEED KILLER

- For post-or pre-emergent control
- VOC-compliant
- Effective for one year

CARE FOR WORK ENVIRONMENTS®

FORMULA 400-X PARCH®

CONCENTRATED, NON-SELECTIVE WEED KILLER

FORMULATED FOR RESULTS

This emulsifiable concentrate, non-selective herbicide is used for controlling a variety of annual and perennial weeds and grasses. It is recommended for use only on non-cropland areas such as railroad right-of-ways, fence rows, parking lots, outside of buildings, loading ramps, storage yards, tank farms and industrial sites. The degree of control and duration of results depends on the amount of herbicide applied, soil type, rainfall and other conditions. This product is also highly recommended for municipal weed control and as a semi-soil sterilant.

FOR USE ON/OR AROUND:

- Storage areas
- Pumps
- Machinery
- Fuel tanks
- Recreational areas
- Roadways
- Guard rails
- Airports
- Military installations
- Highway medians
- Pipelines
- Lumberyards
- Rights-of-way
- Fences
- Railroads

Also...

for use around buildings or industrial sites (cross connects, pedestals, transformers, vaults, buried cable closures, telephone booths, and fire plugs) where bare ground is desired. A wide variety of annual and perennial weeds and grasses are controlled in the above sites.

DIRECTIONS FOR USE:

It is a violation of federal law to use this product in a manner inconsistent with its label.

This product is designed for non-selective weed control in non-cropland areas such as parking lots, fence rows, railroad sidings, storage yards, around buildings or industrial sites.

Mix 1 gallon of this herbicide with 10 gallons of water and apply uniformly over 1000 square feet of soil surface. Thoroughly wet all foliage to insure contact action. Best results are obtained when the applications are made during or after weed emergence while growth is succulent. Where vegetation is tall and dense, use 1-1/2 gallons of this product with 10 gallons of water per 1000 square feet.

For control of hard-to-kill perennial weeds and grasses such as Johnsongrass, bindweed and wild carrot, use 1-1/2 to 1-2/3 gallons of this herbicide mixed with 10 gallons of water per 1000 square feet. Although this product has considerable activity through foliar contact, much of its activity is through the roots; therefore, adequate rainfall is necessary to move the herbicide into the root zone.

Care must be taken to keep this herbicide away from desirable flower beds, lawns and shrubs. Do not apply over roots of valuable trees, shrubs or woody ornamental plants. Only apply this herbicide outside the dripline of trees. Avoid spray drift to desirable plants. For all applications, do not apply more than 60 gallons of this product per acre per year.

TECHNICAL DATA:

APPEARANCE: light yellow liquid

ODOR: petroleum

ACTIVE INGREDIENTS: Prometon:2,4-bis (isopropylamine)-6-methoxy-s-triazine 3.73%

FLASHPOINT: 145°F

AUTHORIZATIONS: registered with the Environmental Protection Agency
